

# MANAGING SPILLS

IT IS RECOMMENDED THAT YOUR VESSEL CARRIES YOUR OWN ABSORBENT PADS, THESE CAN BE PURCHASED FROM WA FUEL SUPPLIES

- Use the emergency stop button
- Call for help if required
- Tell everyone in the area to put out any other ignition sources – make sure no one starts an engine
- Have fire extinguishers ready in case fire breaks out
- Small spills should have absorbent pads placed on the liquid to absorb it.
- Petrol spills are extremely dangerous and should be left to professionals.
- Do not use chemicals or detergents on spills.
- If a spill is large seek help via the emergency numbers listed but try to contain the spill with absorbent pads and the booms and mops available in the spill kits.
- All spills should be reported to WA Fuel Supplies, if not reported and spill kits are used there risks being no spill kit products available for others to use.
- For land based spills the priority is avoiding spills entering the water.
- Put all used and contaminant products in the large plastic bag in your Spill Kit provided for this purpose.
